Gusty winds, 20 to 25 mph, will combine with low humidity, 8 to 14%, to create the potential for High Fire Danger. Any fires that develop will likely spread rapidly. Outdoor burning is not recommended.

Beautiful sunny skies and temperatures well above normal for this time of year is on tap for today. Winds out of the south to southwest will be a bit breezy. These winds combined with low humidity will create elevated to near critical fire weather conditions west of a Throckmorton to Sonora line in the afternoon through early evening time period.
